

TEMP-AIR® Heats Up With Newly Released Website

Burnsville, Minnesota, June 22, 2007 – Thermal Remediation from TEMP-AIR® announces the launch of its long awaited website. The Thermal Remediation website, www.thermal-remediation.com, offers solutions for an effective pest control alternative without the use of chemicals. It also provides information on pallet heat treatment methods as well as the latest industry news.

Thermal Remediation pest heat treatments:

- kill the entire life cycle of insects and pests
- uses non-chemical, non-toxic, non-residual, and non-corrosive heat treatments
- heat treats an entire structure or spot treats high infestation zones
- heat treats bins and silos in a rotation for continued production

Pest heat treatments are used successfully in a wide variety of commercial and industrial applications. The heating systems provide an environmentally friendly alternative to chemical fumigations.

The website has articles written by Dr. Raj Hulasare, Senior Scientist and Thermal Remediation Product Manager, and current information regarding Propane Educational & Research Council (PERC) grants on chemical replacement research. The website also includes all the latest industry news on bed bug treatments as well as information on the Emerald Ash Borer (EAB) state mandated quarantines.

The website can be accessed by going to www.thermal-remediation.com.

About Thermal Remediation from TEMP-AIR®

For more than 40 years, TEMP-AIR® has developed a reputation of excellence and has grown to be the nation's leading provider of temporary, portable HVAC solutions. Building on that expertise, Thermal Remediation from TEMP-AIR® has developed the safest, most effective and environmentally friendly alternative to chemical fumigation or fogging. The worldwide patented process produces a dry heat of at least 120°F, which is then held evenly throughout the treated space for 24 hours or the required time for that application. This patented process kills the full life cycles of all pests, in any structure, without damage to the building, or equipment and leaves no damaging residue.

For additional information on Thermal Remediation from TEMP-AIR®, please visit the new website www.thermal-remediation.com, call 800-836-7432 or email TRsales@temp-air.com
